

Name: **Demon Mathys**

Identification N°: **6857548023**

Date of Birth: **19 Jul 2006**

Test Date: **13 Apr 2026**

Valid Until: **13 Apr 2028**

Client/Institution: **GAD ARDECHE DROME France, Metropolitan**

CEFR: Common European Framework of Reference

### Typical strengths for your **Listening** score

Your scaled score is close to 200. Test takers who score around 200 typically have the following strengths:

- They can understand short (single-sentence) descriptions of the central idea of a photograph.
- They can sometimes understand the central idea, purpose, and basic context of extended spoken texts when this information is supported by a lot of repetition and easy vocabulary.
- They can understand details in short spoken exchanges and descriptions of photographs when the vocabulary is easy and when there is only a small amount of text that must be understood.
- They can understand details in extended spoken texts when the requested information comes at the beginning or end of the text and when it matches the words in the spoken text.

To see weaknesses typical of test takers who score around 200, see the Proficiency Description Table.

### Typical strengths for your **Reading** score

Your scaled score is close to 150. Test takers who score around 150 typically have the following strengths:

- They can locate the correct answer to a factual question when not very much reading is necessary and when the language of the text matches the information that is required.
- They can understand easy vocabulary and common phrases.
- They can understand the most-common, rule-based grammatical structures when not very much reading is necessary.

To see weaknesses typical of test takers who score around 150, see the Proficiency Description Table.

\* The range of total scores associated with each CEFR level is estimated by adding the relevant cut scores from the Listening and Reading test section CEFR mappings. Whenever possible, ETS encourages score users to consider CEFR levels separately for Listening and Reading rather than using a single overall estimate based on the total score. This approach is more precise and considers a test taker's language profile, which may differ between listening and reading comprehension.

Note: TOEIC scores more than two years old cannot be reported or validated.

This score report is intended for use in the country of Client/Institution.
